seifomild[®]
Seifencreme für Seifomat Seifenspender

Soap: Only use liquid cream soap, detergent, shampoo, etc. for private use (so no industrial soap). We recommend our soap cream Seifomild®; this soap cream is specially designed for use in soap dispensers. It is subtly perfumed with a pleasant fragrance, dermatologically tested, free of sodium chloride, is cosmetically mild for the skin, DIN tested and biodegradable.

Note: Especially industrial hand cleaners, natural (organic) liquid soaps and agents with a high Content of disinfecting components can lead to faster wear of the pump mechanism. The cleaning product must under no circumstances contain abrasives and/or solvents. If in doubt, consult the supplier of the cleaning product.

Global guidelines for liquid soaps, etc.:

pH	: 6 - 7,5	Complex images
Perfums	: < 1%	(EDTA, NTA)
vegetable oils	: < 1%	Optimal
animal fats	: < 1%	Viscosity (20°) : 700 -3000 mPa·s
		Seifomild soap: 1500-2000 mPa·s
